Avoid account & password recovery services For your security, you cant call Google for help to signinto your account. We dont work with any service that claims to provide account or password support. Do not give out your passwords or verification codes. Post to the help community Get answers from community members reCAPTCHA is a free service from Google that helps protect websites from spam and abuse. A CAPTCHA is a turing test to tell human and bots apart. It is easy for humans to solve, but hard for bots and other malicious software to figure out. By adding reCAPTCHA to a site, you can block automated software while helping your welcome users to enter with ease. Try it out at . To learn more about reCAPTCHA, visit our official website or our technical documentation site. Just click the checkbox: If you see a green checkmark, congratulations! Youve passed our robot test (yes, its that easy). You can carry on with what you were doing. Sometimes we need some extra info from you to make sure youre human and not a robot, so we ask you to solve a challenge: Simply follow the on-screen instructions to solve the puzzle and then carry on with your task. reCAPTCHA works with major screen readers such as ChromeVox (Chrome OS), JAWS (IE/Edge/Chrome on Windows), NVDA (IE/Edge/Chrome on Windows) and VoiceOver (Safari/Chrome on Mac OS). reCAPTCHA will alert screen readers of status changes, such as when the reCAPTCHA verification challenge is complete. The status can also be found by looking for the heading titled recaptcha status in the recaptcha widget section of the page. See reCAPTCHA ARIA Status Messages for more information. Please use the following steps to solve an audio challenge: If you are presented with a visual challenge, locate and click on the button. You will be presented with one of two versions of the audio challenge depending on whether youre using a mobile device. Press PLAY and enter the numbers you hear in the text input box located after the PLAY button or audio control. If your focus isn't automatically set on the text input box after pressing the PLAY button, tab to proceed to it. When youre done entering the numbers from the audio, press ENTER or click on the Verify button to submit your answer. If your answer is incorrect, you will be presented with another audio challenge. If your answer is correct, the audio challenge will close and the reCAPTCHA checkbox will become checked. ReCAPTCHA will also notify the screen reader of the successful verification. Please note that the verification will expire after some time and you will need to start over if this occurs. You will be notified if the verification expires. Tips If the audio doesnt play, try downloading the audio by locating and clicking on the link. While in the text input box, you can press the R button to replay the audio from the beginning To get a different audio challenge, locate and press the button. The reCAPTCHA verification expires after a certain amount of time so it is best to complete the reCAPTCHA verification last on a website you are accessing. Some screen readers may have difficulties getting into forms mode, if this happens, please use your screen readers functionality to force forms mode. reCAPTCHA ARIA Status Messages Status message Detailed description Recaptcha requires verification The initial state, reCAPTCHA verification is required to proceed on this website. Click the checkbox to get a verification challenge. Opening verification challenge The checkbox has been clicked and a challenge is loading. You are instantly verified if the status changes to You are verified. Otherwise, you are required to complete a verification challenge. Verification challenge expired, check the checkbox again for a new challenge The verification challenge expired due to timeout or inactivity. Click the checkbox again for a new challenge. You are verified You have been verified. You can now proceed on the website. Verification expired, check the checkbox again for a new challenge The verification expired due to timeout or inactivity. Click the checkbox again for a new challenge. Dont worry. Some CAPTCHAs are hard. Just click the reload button next to the image to get another one. Our unusual traffic help page describes what to do if you see this message:"We're sorry, but your computer or network may be sending automated queries. To protect our users, we can't process your request right now." If you're seeing this reCAPTCHA challenge, your browser environment doesn't support the reCAPTCHA checkboxwidget. There are a few steps you can take to improve your experience: Make sure your browser is fully updated (see minimum browser requirements) Check that JavaScript is enabled in your browser Try disabling plugins that might conflict with reCAPTCHA Please note that some sites may have incorrectly integrated withreCAPTCHA- in this caseplease contact the site'swebmaster. You can use your computer or Android tablet to chat with your friends through Google Messages for web, which shows whats on your Google Messages mobile app. Google Messages for web sends SMS messages using a connection from your computer to your phone, so carrier fees will apply, just like on the mobile app. Important: Your Google Account is used to: Pair the mobile app and your device. You can pair your Google Messages account on multiple devices, but only one computer can be active at a time. If you choose to use the QR code option instead of a Google Account, the QR code is unique to your computer or tablet. Tip: You might get charged for data if you use your phone. To avoid extra charges, connect your phone to Wi-Fi. On your phone, open Google Messages . At the top right, tap your account menu Device Pairing. If you get a prompt to sign in with your Google Account, select the account that you want to use with Google Messages and continue. On your computer, in a browser, like Chrome or Safari, open Google Messages for web. Sign in to Google Messages for web with the same Google Account that you chose on your phone. On your phone, you get a dialog in Google Messages with 3 emoji, tap the emoji that matches the one shown on your computer screen. Your phone vibrates when the pairing completes and you can find your messages on your computer screen. If you dont have a Google Account, find the option to pair with a QR code. Important: Your latest conversation threads, contacts, and other settings will be encrypted and cached on your browser. If you dont use your Google Messages account for a few weeks, youll be unpaired automatically for security reasons. When you have unread messages, the Google Messages icon in your browser tab will show a red notification and the number of unread messages. Tip: You can make Google Messages for web look darker or use high contrast: On your computer, click More Enable Dark theme. Unpairing helps keep other people from seeing your messages and sensitive info, like two factor verification codes or personal details. If you're using Google Messages for web on a shared or public computer, unpair when you're done. On your phone, open Google Messages . At the top right, tap your account menu Device Pairing. Choose where to unpair: Unpair one computer: Next to the computer you want to disconnect, tap Delete Unpair. Unpair all computers: Tap Unpair all computers. You can check your messages from your Android tablet with Google Messages. If you don't have Google Messages on your tablet, you can get it from Google Play. Important: When you use Google Messages on your tablet, carrier fees apply. Tips: To open Google Messages on your tablet, follow the same steps as outlined above on Set up Google Messages for web. If you choose not to pair with your Google Account, the unique QR code for Google Messages pairs the mobile app to your tablet. Some tablets with cellular connectivity and a SIM card can send messages without a connection to your phone. This lets your tablet work like a mobile phone. Post to the help community Get answers from community members If you use Gmail, you already have a Google Account. With a Google Account, you have access to Google products at no charge like Drive, Docs, Calendar, and more. To sign in to your Google Account (or any Google product): Go to the sign in page of the product (for Google Accounts it is myaccount.google.com). Enter your Gmail username (everything that appears before '@gmail.com'). Enter your password. Add Gmail to an existing Google Account If you add Gmail to your Google Account, your account's primary username permanently changes to yourusername@gmail.com. After you add Gmail, the original email address associated with your account becomes your alternate email address. If you verify your original email address before you add Gmail, you can sign in with this email address. To add Gmail to your Google Account: Go to mail.google.com. Fill out the form. Click Submit. To verify your account, follow the instructions. Tip: If you use Sign in with Google or Chrome Remote Desktop and you change your primary email address, you may experience issues. Learn about issues with primary email address change. Common issuesI don't think I have a Gmail account New Google Accounts come with Gmail, so you should already have a Gmail address if you've created your account recently. If you never created a Gmail account, you can sign up at no charge. To create a Gmail account: Go to Gmail.com. Select More options Create an account. Follow the onscreen instructions. I think I deleted my Gmail account If you already have a Google Account and deleted your Gmail account, you can add Gmail to your current Google Account. To add Gmail: Go to mail.google.com. Sign in to your Google Account. Follow the onscreen information to add Gmail to your account. When you add Gmail, your Gmail address will become the primary username on your account. It will be what others see when you share information, such as documents or photos, from your Google Account. Your original email address will become the recovery address on your account. If you have more questions, visit the Gmail Help Center. Post to the help community Get answers from community members Current imagery automatically displays in Google Earth. To discover how images have changed over time or view past versions of a map on a timeline: On your device, open Google Earth. Search for places. To view a map over time, you can either: In the toolbar, click Historical imagery . Click View Historical Imagery. This feature isnt available if youre using the Map basemap. To enable this feature, change your basemap to Satellite. Select how you want to view the map. To turn on historical imagery view, at the top left, click Historical imagery . To turn on timelapse, at the top left, click Timelapse . A timeline appears. At the top right, click the timeline to explore the map over time. To find a specific time, you can either: Click the year you want to view in the timeline. Click Previous or Next . To lock the latest imagery, click Last page . To minimize the historical imagery toolbar, at the top right, click Collapse . At the top left, the toolbar remains active as a floating chip. To deactivate historical imagery, click Historical imagery . Tips: To optimize your viewing experience, 3D buildings feature is turned off when historical imagery is turned on. Satellite image availability is represented on the slider. Image availability may change as you explore. Years are marked by dots. Smaller dots indicate additional months. If a previously selected year becomes unavailable, its dot on the slider turns gray. Global coverage varies.
