The release date was not announced, but fans can wait for this new season at the end of 2022 or 2023.] Wacej finally shortened, the commitment shown in this video is amazing. The film was so free and running that he felt like he was flying an hour and a half with an exciting start and a story with a great climax. The story was well written with the fact that the main evil guy was one of all the single experiments, and the goal was just an ordinary child, and shows how useful everyone could end up, especially at the end. Inspiration, Mha's main story is the hero. The story was also completely different from the trailer, which made him feel great to make him an unpredictable and unique story. The bad guy was much better than the first movie, but even though the film did not make his motivation, it was obvious that he wanted to steal the strange Child. The blanket and Bakuga were probably often the same, but Bakugou's development on the island really shone because it was different from other heroes. Even if you see both a blanket with someone, it was heartbreaking to see that everyone was incredible. The story is well written and progresses in the first class, not stagnant and is not very useful in the first film. The last was satisfactory and beautiful when I saw it nine in the field of flowering, because after all, it was just an experiment and shigaraki the main bad man: no place 2. Animation was absolutely impressive. Every movement felt in liquid trivial scenes and there was no laziness or neglect. The animators made a lot of effort for us, and the war scenes were equally surprising, though not better than we saw in season 3 and 4. When music is stolen in the background of the war scene and is quiet, I love it, so without a word I show a lot of feelings. Ost did it as usual and made me well and sent me tremor like my academic hero. After all, I liked this movie, and while others could say that it looks a bit childish, I really liked it, even though he didn't invest in souls.
