Una versione di VNC gratuita e facile da installare, ma povera di funzioni avanzate I VNC sono software di controllo remoto. Ovvero attraverso la classica accoppiata client-server, permettono di controllare un computer remoto (il server) attraverso la macchina su cui si sta lavorando (il client, anche chiamato Viewer). Naturalmente le due macchine non devono avere necessariamente lo stesso sistema operativo. Ad esempio attraverso un client Windows XP si pu controllare un server Vista, e viceversa. Questa versione gratuita prodotta da RealVNC contiene tutto il necessario per creare una comunicazione di questo tipo. Sia il server che il client si installano facilmente. Una volta stabilita la connessione, all'interno della finestra di VNC si vedr il desktop o il terminale del computer su cui in funzione il server. Naturalmente se si lavora in ambiente grafico consigliabile una connessione molto veloce, visto che i dati trasferiti tra le due macchine sono tanti. E anche con un collegamento rapido, bisogna mettere in conto che la velocit di risposta del server non pu essere rapida come se si stesse lavorando sul computer fisico. Per prendere confidenza con questo sistema, VNC Free Editon va pi che bene, ma se si ha bisogno di maggiore sicurezza, funzionalit avanzate come il trasferimento di file tra le macchine e soprattutto una versione che funzioni su sistemi operativi non Microsoft, bisogna rivolgersi alle versioni Personal o Enterprise. Ovviamente a pagamento. Installazione immediataFunziona benePoche funzioni avanzateVersione gratuita solo per Windows TightVNC 2.8.85 runs on Windows XP and all later versions (see more details here). See What's New in TightVNC 2.8.85 and all previous versions. Improved Viewer for Many Systems and Platforms Remote Ripple is a free, cross-platform remote desktop viewer designed with user-friendliness in mind and powered by our Remote Core SDK. As a newly released software, it may not have all the features of TightVNC Viewer, such as listening mode. However, we are committed to actively developing and improving it. Give it a try and let us know how we can make it even better for you! Download Remote Ripple, our modern VNC client for Windows, Mac, iOS and Android Need Monitoring and Managing Many VNC Remote Desktops? Try MightyViewer, our Multi VNC Viewer for Windows. It shows many live remote desktops together, allowing to take over one of them when needed. Use it for monitoring computer classes, controlling factory hardware, managing remote desktops, administering users' PCs, and so on. Download MightyViewer for Windows (free download, no registration, no obligations) TightVNC Licensing Terms There are two licensing options available for TightVNC 2.x software: GNU GPL (GNU General Public License version 2) completely free but does not allow mixing with closed-source products. Commercial source code license. Unlike GPL, it allows integrating the software into proprietary products, although it's not free. Read more about commercial licensing. Older Versions of TightVNC If you need a version working in Windows 95/98/ME, Windows NT 4.0, or in Unix-like systems (including Linux), download TightVNC 1.3.10. We use cookies to enhance your site experience and for analytical purposes, as explained in our Privacy policy. If you continue to use the site, please consent to the use of cookies. Accept and Close Version changes UltraVNC is a powerful, easy to use and free - remote pc access softwares - that can display the screen of another computer (via internet or network) on your own screen. The program allows you to use your mouse and keyboard to control the other PC remotely. It means that you can work on a remote computer, as if you were sitting in front of it, right from your current location. VNC (Virtual Network Computing), the Remote Frame Buffer protocol (RFB) allows a desktop to be viewed and controlled remotely over the Internet. A VNC Server must be run on the computer sharing the desktop, a VNC Viewer (Client) must be run on the computer that will access the shared desktop. UltraVNC Software Products UltraVNC UltraVNC SC PcHelpWareV2 uvnc2me GPL Yes Yes No No Free Yes Yes Yes Bundling (1) No No Yes Yes NAT (2) Yes (4) Yes (4) Buildin Buildin NAT2NAT(3) Via Repeater (5) Via Repeater Buildin Buildin Network Protocol TCP TCP UDP UDP Acess IP Address IP Address Access Code Access Code Encryption Plugin Plugin Buildin AES Buildin AES Key Plugin Plugin 256bit 256bit Password 8 chars (6) 8 chars 32 chars 8 chars (7) Chat Yes Yes Yes Yes Filetransfer Yes Yes Yes, via chat Yes, via chat Service Yes No Yes No Session (8) Console/Current Console/Current Console/RDP (9) Console/Current Connection Manager No No Yes No Difficulty 5 8 3 1 (1) GPL doesn't allow bundling of GPL and non GPL software. If you want to use UltraVNC or UltraVNC SC in combination with a commercial software you need to create a seperate installer or let your installer download UltraVNC. PcHelpWare or uvnc2me can be bundled without restriction. (2) One site is connected to the internet the other is behind a nat router. (3) Both sites are behind a nat router. (4) The site behind the nat router need to initiate the connection. (5) A seperate application "Repeater" is needed. Both sites make an outgoing connection to the Repeater and the Repeater cross the data. (6) Using the encryption plugin you can use a longer password or a predefined key. (7) The password is generated for each session, access code is fixed. (8) Runing as service you always clone the console, if started as application you clone the current session (console/RDP). (9) PcHelpWare has a preconnect screen that allow to select a RDP or the console session. Supported operating systems - Microsoft Windows 7, 8, 8.1, 10, 11, Windows Server 2008 R2, Server 2012, Server 2012 R2, Server 2016, Server 2019, Server 2022, Server 2025: current version: - Microsoft Windows XP, Server 2003, Vista, Server 2003 R2, Server 2008: this latest version: - Microsoft Windows 95**, 98**, ME**, NT4**: this latest version: Microsoft Windows 2000: this latest version: Its embedded JavaViewer allows you to connect (and make File transfers) from a simple Web Browser on any system supporting Java (Linux, Mac OS, ...) to an UltraVNC Server. PcHelpWare and uvnc2me require XP or later. Compatibility All VNC flavorsfollow the RFB protocol. This common start point means that most of theVNC flavours available today "usually" talk nicely together, allowing for easy cross platform desktop sharing to occur. PcHelpWare and uvnc2me are notRFB compatible. Remote PCAccess Software If you provide computer support, you can quickly access your customer's computers from anywhere in the world and resolve helpdesk issues remotely! With addons like UltraVNC SC (Single Click) your customers don't even have to pre-install software or execute complex procedures to get remote helpdesk support. Anyone who needs to support local or remote Windows users will find UltraVNC products are must-have tools UltraVNC products have been specifically designed to answer the needs of: Help Desk (Internal/External) IT departments Remote Computer Support companies Remote Computer Access Remote demonstration eLearning, classroom control Individuals that want to help their relatives and friends, or access their home PC from work or cybercafes UltraVNC is free for ALL usages.ALL = This include commercial usage. Adobe, Apowersoft, Ashampoo, Autodesk, Avast, Corel, Cyberlink, Google, iMyFone, iTop, Movavi, PassFab, Passper, Stardock, Tenorshare, Wargaming, Wondershare July, 12th 2025-11.3 MB-Freeware Latest Version VNC Viewer 7.14.0 LATEST Review by Daniel Leblanc Operating System Windows 7 / Windows 8 / Windows 10 / Windows 11 User Rating Author / Product RealVNC Limited / External Link Filename VNC-Viewer-7.14.0-Windows-64bit.exe VNC Viewer(formerly RealVNC) enables you to remotely access and control your computers from another computer or mobile device, wherever you are in the world.It is used by individuals and by organizations across every industry sector for a range of different use cases, including providing IT desktop support to colleagues and friends and accessing systems and services on the move. The latest version includes both theVNC Server and Viewer. Choose the VNC Connect subscription that meets your business needs. Home > Easy-to-use remote access for friends and family. Professional > Feature-rich and secure remote access for departments and small businesses. Enterprise > Powerful, flexible, and ultra-secure remote access for the enterprise.VNC Viewer turns your Windows PC into remote desktop software, giving you instant access to your Mac, Windows, and Linux computers from anywhere in the world. You can view your computer's desktop remotely, and control its mouse and keyboard as though you were sitting down in front of it.Then sign in to VNC Viewer on your device using your RealVNC account credentials. Your remote computers automatically appear; simply tap one to screen share. Alternatively, you can connect directly to VNC Connect with an Enterprise subscription or VNC-compatible software from third parties by entering the remote computer's IP address. Note that you may need to configure firewalls and port forward routers.VNC Connect password-protects each remote computer out-of-the-box (you may need to log in to your computer). All sessions are then encrypted end-to-end.During a session, your device's touch screen serves as a trackpad to give you precise control of the remote desktop. Drag your finger to move the remote mouse cursor and tap anywhere to left-click (other gestures such as right-click and scroll are explained in-app).Saving you time, money and much more:Reduce costDecrease support call repeat rates, call handling time, and on-site travel costs.Save timeReduce the need for specialized training and documentation for remote support.Improve qualityProvide engaging, real-time service that improves employee and customer satisfaction.Mitigate riskAnticipate and prevent system failures and the risk associated with on-site service.Increase uptimeAvoid downtime with faster problem identification and resolution.Meet goalsSupport business and compliance objectives with audit and security functionality.How to Use Install the software on your Windows PC Launch VNC Viewer and sign in if required Enter the remote device's IP or hostname Authenticate with the correct credentials Adjust display and connection settings if needed Control the remote computer as needed Disconnect when finished for security System Requirements Windows 7, 8, 10, 11 (32-bit or 64-bit) At least 1 GHz processor Minimum 512 MB RAM (1 GB recommended) 50 MB free disk space for installation Internet connection for remote access Network configuration may be required PROS Easy remote access setup Secure encrypted connections Multi-platform compatibility High-performance screen sharing Free for personal use CONS Limited free version features Requires internet for remote use May experience connection lag Setup can be complex for beginners No built-in file transfer Also Available: Download VNC Viewer for Mac Why is this app published on FileHorse?
